Farmer's wedding at noon,  
Swasting down the field soon  
Who knows food on the trip,  
Comes from their rolling dail?

Very good, this poem is teaching kids that farmers work very hard to grow the food we eat. That's why we shouldn't waste food. You must remember this well, Xue-Dan!

That day, the noodles tasted super delicious.

Also, I wanted I would never waste food made with such effort, right?

Just like always, I dreamt about  
dad, and then I was awoken by  
the sound of crows

What time is it?

Just like always, I realized it was already really late.

You come at a perfect time!  
Come over quickly~

This time we've put in the same group for field work!

Did you see Lei?

Plant your. Does it your.

thought

How could we be  
living together?  
When are you  
dying?

Time for class! Everyone, please go take your seats!

Hate work, and I hate work week. Group wage means I've already been hired!

I hope everyone participated with me another

For this kind work, there are some things you should pay special attention to.

For this kind work, there are some things you should pay special attention to...

to the things you should pay the most attention to are.

However, not everything happened as they usually do.

What are you doing? There aren't any chairs here.

How can I have some food?

Here

Where's my breakfast Airport? I'm super hungry yoi~

Pay attention, this scene is different from the norm.

You!

Didn't I tell you to keep a 3 meter distance?

May I'm hungry

Here, Breakfast Take it!

Then everyone clearly understood what I just said! I won't repeat it again.

Too bold.

What's this? There's a teacher appearing.

So good for the stomach, don't be afraid!

Don't Qian's reputation have anything to do with this?

For this field work, every group has a teacher that will supervise them. The group I will be supervising is...

Unfortunately, in the future, these kinds of scenes may become commonplace.

The group I will be supervising is yours! Lei! You're not allowed to sit in class!

Why throw the teacher at me? That's cruel!

If you want to pass, then obediently pay attention in class! Don't spend little energy!

Life will start to become a lot more colorful right?

They're probably very compatible "under"

I'm so looking forward to what needs a field work. Fu fu~

I'm heading off first. I'm going to the library to borrow some books.

LOVE TO ME

Spring nights

It'd like this space

Food that makes you feel awkward...

The cafeteria food at this school is seriously...

Just looking at it has made me lose my appetite. Such a disgusting pile of...

I never

out.

I've started  
to go into  
culinary  
school, but  
failed.

It's  
because

they don't  
want  
women!

What does a little  
girl think she's  
doing here?

This was a play  
ground you know?

So what, if I'm a girl?  
I know how to cook!  
If you don't believe  
me, I can cook for  
you to prove it!

You still don't  
understand? Even if  
you can, that's still  
nothing! Being a chef  
is no longer a job  
you can do just by  
knowing how to  
cook!

Hurry up and go  
home! Don't come  
back here again!

When he said was right, I saw the school's training room and finally understood what he meant.

For basic training.

They would be trained.

Your area must have extremely strong muscles to survive such training.

It's inside was filled up with iron sand. Flipped that for a while.

Those who lack extra strength can get injured very easily sometimes even crippled.

the students have to practice digging the whole 1000 hours every day.

So I...

Must continue to work hard...

Must condition  
on work hard.

Lei Che, it really is true
